Minimum System Requirements for our Online Classes

To Attend Our Live Online Classes, All You Need is a PC & Broadband Internet Access

Our Online Classrooms are powered by **iVisit Presenter®** which uses industry standard and Internet connections that traverse firewalls and proxies for business users. **iVisit®** is also video peripheral agnostic. It allows you to use any connection type and almost any Windows compatible video source. **iVisit®** is free for unlimited use in attending a meeting or conversation with a friend. Download **iVisit®** at www.िवisit.com.

The quality and speed of your online meeting experience will be governed by the features you use, your PC and video hardware, and the bandwidth available to you in real-time.

Minimum System Requirements

- Windows 2000, XP or later; for premium visual experience, Windows Vista & 7 are preferred
- Pentium 4 or newer
- 512MB RAM available
- Broadband Internet access (DSL, Cable Modem, T1, etc.)
- DirectShow 8.1 or later compatible webcam (E.g., Logitech, etc.) or video input (*Recommended but optional, to send video. This promotes dialog amount the teacher and students.*)
- DirectSound compatible audio input (Common standard equipment. **Required to send voice**), and headset or speakers

No proprietary hardware required. **iVisit®** uses widely available, Windows compatible audio and video peripherals. (Logitech, Creative, Microsoft, Sony, Plantronics, etc.)

Automatic CPU & Bandwidth Adjustment. **iVisit®** monitors your processor availability and bandwidth. Of course you will have better performance and quality with faster CPU and more memory.
